

NOTICE

The Government of Haryana constituted the Haryana Water Resources Authority vide notification No.2/62/2020-1IW dated 14.12.2020 for the purpose of regulation and control of water resources including ground water development and management in the whole of the State and to issue necessary regulatory directions and accordingly the guidelines were issued in this regard.

Accordingly, Project Proponents (Industry / Infrastructure / Mining) who are abstracting groundwater or proposed to abstract ground water are required to obtain NOC/Permission/ Registration from this Authority. As one of the requirements, Project Proponents are required to install telemetry on the flow meters on the bore-wells & share real-time groundwater abstraction data on HWRA portal.

An invitation is extended to the manufacturer of telemeter system and their authorised dealers for a discussion on telemetry devices, scheduled on **11th March 2025, 11 AM at Haryana Water Resources Authority, 3rd Floor, Rear Building, HSVP Complex, Sector-6, Panchkula.**

The session aims to deliberate on the latest technological and regulatory frameworks, challenges related to telemetry devices based on API technology & technical/financial credentials as well as scope of the services of the telemetry system providers, your participation will provide valuable insights into improving the efficiency and integration of such systems across various project proponents.

Meeting Agenda:

- Overview of emerging telemetry technologies based on API.
- Implementation challenges and solutions.
- Compliance with industry standards and regulations.
- Collaborative opportunities for development and deployment.

Note - No TA/DA will be admissible for attending the meeting.
